

PetFriendly Restaurant Finder

This app will allow the user to search to see what restaurants in their area are pet friendly. They will be able to leave a comment about the restaurant and their experience there with their pet.

Technology

- javascript application
 - jquery
 - angularjs?
 - angular ui-bootstrap?
- firebase for data storage?
- simple login
- backbone
- html/css
- twitter bootstrap

MVP

- responsive site
- Restaurant page
 - Picture of restaurant
 - Address of restaurant
 - link to restaurant website
 - previous reviews from site users
 - submit form for user to submit their review
- faq/roles/legalese
- suggest a restaurant for site
 - allows user to submit a restaurant they think should be on the site
 - allows business owner to submit their own restaurant to be included on site

need to know requirements

- the design? workflow
- restaurant info
 - name
 - location
 - image
 - what makes them pet friendly
 - website url
 - menu
- contact info

1) Responsive Site

As a visitor or registered user, I need to be able to use the site on a phone as well as a laptop/desktop.

Assumptions:

There will be a solution through the use of Twitter Bootstrap to make the site responsive

Acceptance Criteria:

- Site is tested on a phone and the functionality is the same as the desktop version.
- On phone, nav bar turns into “hamburger” menu
- On phone, horizontal posts “stack” and become vertical
- no horizontal scroll bar on phone version

2) read reviews

As a pet owner I want to know what local restaurants are pet friendly. I need to be able to read reviews others have posted.

Assumptions:

- through ajax the latest reviews will be loaded from server when user opens restaurant page

Acceptance Criteria:

- reviews will be visible on every restaurant page when page is loaded

3) User will be able to post own review

As a pet owner I want to be able to post my own review of a restaurant

Assumptions

There will be a solution using CRUD/Ajax to post a new review to the server/page

Acceptance criteria:

- When user types review and hits submit the review shows on the review page

Notes

this is a child story of the Profile Epic

Roadmap - v1.0 and Beyond

- search functionality
- be able to search for a restaurant instead of just a list of them
- ability for restaurant owners to make their own restaurant page and maintain it with updated info
- add more cities
